

Mindray DC-40 Original Touch Panel Screen 021-000245-00

Our Product Introduction

for more products please visit us on 3dultrasoundprobe.com

Basic Information

- Place of Origin: China
- Brand Name: Mindray
- Model Number: 021-000245-00
- Minimum Order Quantity: 1pc
- Price: negotiable
- Packaging Details: carton
- Delivery Time: 3-5 days
- Payment Terms: T/T, Western Union
- Supply Ability: 10-30pcs/month

Product Specification

- Warranty: 60 Days
- Lead Time: 3-5 Working Days
- Service: Outright/Exchange
- Shipping Method: Express, or As Clients Required
- Highlight: Mindray DC-40 touch panel screen, 021-000245-00 touch panel screen, DC-40 touch panel screen

Product Description

Mindray DC-40 original touch panel screen 021-000245-00

1. Compatible system: Mindray DC-40
2. Condition: new and used
3. Sale: Exchange and outright
4. Lead time: 3-4 days
5. Part number: 021-000245-00

Welcome to contact for more details!

Mindray's DC-60, incorporating innovative technologies from advanced ultrasound systems, delivers optimal image quality and a wide range of application capabilities all at an affordable cost. In particular, its unique touch gesture feature is designed to help improve workflow and facilitates ease and confidence of use, enabling you to put patient care first. In short, DC60's **capabilities and efficiency** make it a practical choice and a good investment for clinicians.

Advanced technology

High performance, powered by imaging technologies including iClear, iBeam, PSH, Echo Boost, and highly user-centric operation techniques, means the DC-60 is a hard-working machine addressing challenges faced by you while scanning under pressure.

Echo Boost

As Mindray's new breakthrough image processing technology, Echo Boost is designed to utilize native raw signals to enhance the weak echo signals while suppressing surrounding noise, providing you with a clearer chamber view and improved visualization of the myocardial tissue layers.

Shared service meets every need

Thanks to DC-60's shared service capabilities, reliable image quality for patients of various ages and sizes in diverse clinical areas is now available all with one intelligent ultrasound machine. Covering general imaging, cardiology and OB/GYN, the DC-60 has professional tools such as **Auto IMT, iNeedle, TDI and QA, 4D imaging** and Smart OB to help complete daily exams easily and precisely.

Auto IMT

The DC-60's Auto IMT not only detects the thickness but also provides the IMT trend graph, which allows a more accurate assessment of a patient's risk of developing cardiovascular disease.

TDI and QA with Strain Rate

The TDI functionality of the DC-60 facilitates quantitative evaluation of regional myocardial movement and global myocardial function, providing complete TDI modes for faster and more direct diagnoses.

Get more done faster

With touch-screen gesture, a brand-new operation experience is at your fingertips, creating a new standard and style for workflow. The clinician can complete most of the operations just with the touch screen. Whether it's swiping to review images, shifting the image to and from the monitor, zooming in/out, measuring or starting user-defined functions with specific hand motions, the DC-60 allows you to get more done, much faster.
