

Repair Karl Storz Rigid Scope 26008 BAC Campo Trophyscope

Our Product Introduction

for more products please visit us on 3dultrasoundprobe.com

Basic Information

- Place of Origin: Japan
- Brand Name: Karl Storz
- Model Number: 26008
- Minimum Order Quantity: 1pc
- Price: negotiable
- Packaging Details: carton
- Delivery Time: 3-5 days
- Payment Terms: T/T, Western Union
- Supply Ability: 10-30pcs/month

Product Specification

- Warranty After Fixed: 60 Days
- Repair Time: 3-5 Working Days
- Service: Repair Service
- Shipping Method: Express, or As Clients Required
- Highlight: **Repair Karl Storz rigid scope, 26008 BAC Campo Trophyscope, Karl Storz rigid scope 26008 BAC**

SONOSCAPE P50 Ultrasound System

Accurate - Intuitive - Flexible

Adhering to its great image quality, SonoScape's newly released P50 carries a comprehensive, upgraded platform, to become an epoch-making ultrasound system. It is equipped with powerful single crystal transducers, remarkable 4D functions and intelligent workflow, which perfectly helps to meet a wide variety of general imaging needs. Outfitted with extraordinary software and hardware, P50 is perfectly a balanced design, internally and externally. The quick response touch screen, mode switching and storage operations deliver a new standard with clarity and flexibility.

Improve your confidence

Single crystal: better penetration, higher resolution, greater sensitivity. Extremely clear image performance with unique imaging, optimized technology from SonoScape.

Ease of use

New platform leads to an efficient workflow and provides excellent human-machine interaction. It allows us to quickly respond to the needs of customers as well as user defined settings.

Fits your needs

SonoScape P50 provides various imaging software to fit different applications such as cardiology, radiology, OB/GYN, etc. With advanced features including cardiac and 4D packages, P50 can meet the extensive needs of clinical challenges of today and tomorrow.

Superior Techniques

SonoScape P50 is configured with a new imaging engine, which can significantly optimize image performance, especially for 3D/4D imaging with speed and convenience. S-Live provides 4D imaging with intelligent rendering, leading to a vivid fetus image. Advanced 4D inversion technology can assist doctors in analyzing anechoic anatomic structures by clearly visualizing the details of desired regions of an unborn child, looking for abnormalities, which can provide more information than

conventional ultrasound systems could normally obtain. Outstanding volume performance makes P50 outshine others on volume imaging, and dramatically enhances diagnostic confidence.

Single Crystal Probes

SonoScape P50 is equipped with a wide band single crystal probe for abdominal and cardiac scanning, which can greatly improve signal to noise ratio, and acquires stunning images with better resolution and richer imaging detail. Compared with a conventional transducer, a single crystal probe has significantly improved acoustic energy conversion capacity, which means the probe has better performance as well as longer working life.

Superior Slim Design

The design of P50 took operational use into consideration, creating a comfortable diagnosing environment. Ergonomic design, excellent man-machine interaction and rapid response, combined with a slim design makes P50 as an intelligent scanning assistant for you, bringing improved efficiency and helping to prevent fatigue from multiple examinations.
